

# PLATINUM-TO-PLATINUM FIRING FOR SUPERIOR DURABILITY

FOR OE/DIS ENGINES THAT FIRE THE SPARK  
IN BOTH DIRECTIONS

## FEATURES & BENEFITS

Features platinum-to-platinum firing. Virtually eliminates gap erosion, reduces misfires, and provides improved durability.\* It's the superior-performing spark plug providing preferred technology for DIS engines.

• Super conductive Yttrium enhanced ground electrode provides superior heat transfer

- Platinum enhanced high nickel alloy side electrode maintains precision gap
- Platinum tip assures virtually no gap erosion for longer plug life
- Maintains optimum performance and fuel efficiency longer\*

\* Compared to standard plugs

† Please refer to [autolite.com](http://autolite.com) for terms and conditions of the lifetime limited warranty.

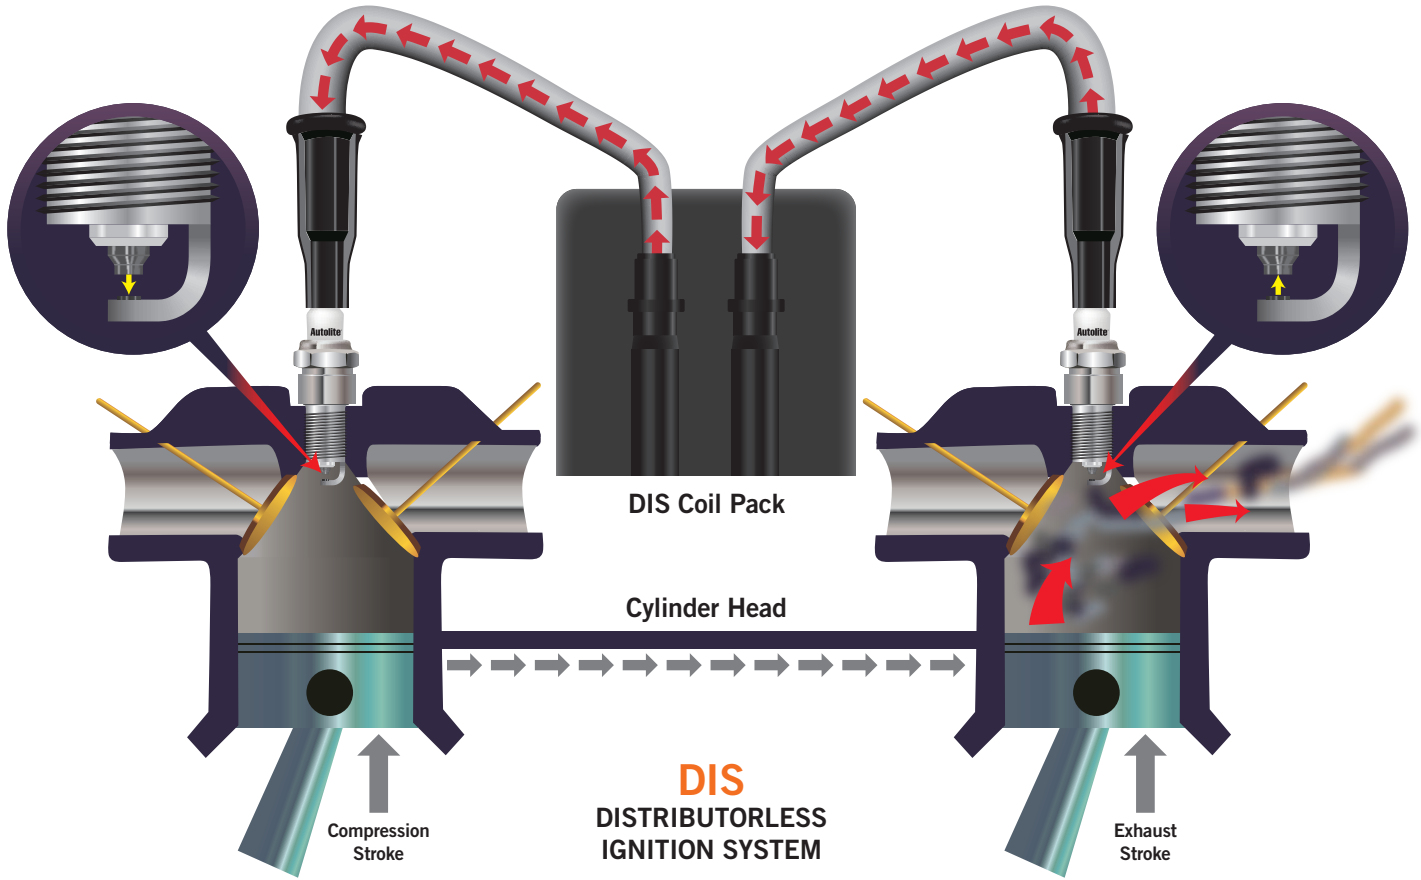

**GUARANTEED FOR 5 YEARS\***

\* For more warranty details, visit [autolite.com](http://autolite.com)

**DISTRIBUTORLESS IGNITION SYSTEMS (DIS) fire in both directions.**

The protection of platinum on both electrodes provided by Autolite® Double Platinum Spark Plugs means superior performance with virtually no gap erosion over a longer life.
