

IT'S LIKE GETTING WIRES TAILOR-MADE WITHOUT THAT UNCOMFORTABLE INSEAM MEASUREMENT.

HEAT SHIELDS

offer heat protection by reflection and dissipation.

EXTENSION TUBES

allow easy installation and removal of spark plug insulators.

Aftermarket wire sets sell better when they fit. And that's precisely what the new Autolite® Professional Series ignition wire sets do. With over 600 different models that meet or exceed OES requirements, these wire sets not only perform as well as the factory sets, they're also easy to install. And there is nothing uncomfortable about that. For more information, go to www.autolite.com.
